

Equip Your Laboratory with the Newest, Most Advanced Molecular Spectroscopy Instruments

Shimadzu offers more spectroscopy instrumentation, with more software and accessory options, than any other company. As part of our commitment to the academic community, we are offering special pricing when purchasing our latest instruments as a package:

▶ **Compact, Portable FTIR Spectrophotometer (IRSpirit)**

Delivers unmatched functionality in its class of instruments, while delivering exceptional reliability and ease of use.

▶ **Easy-to-Operate UV-Vis Spectrophotometer (UV-1900)**

Incorporating advanced features that improve usability, regulatory compliance, and performance.

▶ **High-Performance Fluorescence Spectrophotometer (RF-6000)**

Provides outstanding speed, sensitivity, and stability for a wealth of fluorescence applications

Special packages/pricing available for the academic community.
