

Turnkey HPLC Analyzers for Quantitative Determination of Cannabinoids in Cannabis and Hemp

Shimadzu's Cannabis and Hemp Analyzers are the comprehensive solutions for cannabinoids analysis. Integrating instrument hardware, three proven HPLC methods, certified standards and all supplies, these packages are designed for accurate results with minimal effort. A 3-year warranty and preventative maintenance plan ensures trouble-free use and maximum up-time.

- ▶ Ready for use after one day of installation and testing
- ▶ No time-consuming method development required
- ▶ Simplified workflow with dedicated user interface
